

Cyber Valley Boilerplates

short version

About Cyber Valley

Cyber Valley is Europe's largest center of excellence for artificial intelligence and modern robotics. By creating a vibrant ecosystem, facilitating smooth collaboration and rapid knowledge-exchange between science, business, and society, we envision a future where the full potential of intelligent systems is leveraged for the greater good of the world.

Cyber Valley stands for entrepreneurial spirit and is made up of three key parts: **the Innovation Campus, the Company (GmbH), and the Community**. Together, we aim to boost research, development, application, and acceptance of intelligent systems— with a strong focus on ethical and societal impacts. As a beacon and platform for the pioneers involved, we are actively helping to establish Baden-Württemberg on the global map of AI.
